

To the Human Resources Manager

Subject: Unsolicited application for the position of Full Stack Developer

Dear Sir/Madam,

I am writing to apply for a spontaneous Full Stack Developer position at your company. With a strong academic background in computer science and significant experience in software development and teaching, I am confident in my ability to make a positive contribution to your team.

I hold a Master's degree in Computer Science from the École Supérieure d'Infotronique d'Haïti and have obtained a comparative evaluation of studies completed outside Quebec, equivalent to a bachelor's degree in computer science. Additionally, I have recently completed certifications in Angular and Java Spring Boot, demonstrating my commitment to continuous learning and skills development.

During my professional experiences, I had the opportunity to teach programming at the Institut Supérieur de Technologie et des Sciences Administratives (ISTSA), where I planned and delivered courses dynamically and structurally. My goal was to encourage students to develop their skills and succeed in their studies.

As a full stack developer, I have worked on various projects using technologies such as ReactJS, NodeJS, Java, JavaScript, TypeScript, Spring Boot, and PHP. My experience in development and project management in an agile environment has allowed me to hone my technical skills and work effectively in a team.

I am particularly motivated by the opportunity to leverage my web development and project management skills within your company. My expertise in computer science, combined with my teaching experience, would enable me to significantly contribute to the development and success of your technology projects.

Thank you for considering my application. I am available for an interview to discuss in more detail how I can contribute to the success of your institution.

Sincerely,

Jean Waston Therane
